

# **INSTRUCTIONS FOR USE OF**

## **NEBRASKA CONSTRUCTION SPECIFICATION**

### **(NE-208) - WATER CONTROL VALVES**

#### **1. APPLICABILITY**

Construction Specification NE-208 is applicable to water control valves used in pipelines, underground outlets, or other structures. It includes but is not limited to float valves, gate valves, air vent/vacuum relief valves, pressure reducing valves, and freezeproof hydrants.

#### **2. MATERIAL SPECIFICATIONS**

There are no material specifications associated with Construction Specification NE-208. Quality of water control valves will be shown on the plans with an "equal to or better than ..." statement referenced to a certain brand and model number.

#### **3. ITEMS TO BE INCLUDED ON SPECIFICATIONS AND/OR DRAWINGS**

- A. Dimensions and elevations of valve location.
- B. Description, diameter, and maximum operating pressure of the valve.
- C. There are no standard drawings which apply to this specification.
